

REVIEW • COORDINATE • REPORT

Coordinator role in one page

Use the coordinator portal to review the participant request queue, respond to ride actions, submit on behalf of an approved participant, and monitor program activity.

The screenshot shows the 'Camden County coordinator' portal. On the left is a sidebar with links: 'Coordinator' (active), 'Participant snapshots', 'Request for a rider', and 'Sign out'. The main content area is titled 'Transportation overview' with a subtitle 'Review requests, monitor spending, and coordinate approved riders.' It features five summary cards: 'Pending' (4), 'Needs attention' (2), 'Confirmed' (13), 'Month to date' (\$2,841.75), and 'Contract to date' (\$6,920.25). Below these is a 'Request queue' section with a search bar and a status filter dropdown. A button 'Request for a rider' is in the top right, and 'Export filtered CSV' is in the bottom right of the queue section. Numbered callouts 1 through 3 highlight specific UI elements.

Status	Count
Pending	4
Needs attention	2
Confirmed	13

Category	Amount
Month to date	\$2,841.75
Contract to date	\$6,920.25

Request queue
Trip costs are visible only to authorized coordinators and Lake Ride Pros staff.

Status or active action: [All statuses]

2 requests

Example screen uses sample participant, request, and cost information.

Coordinator workflow

1 Start with the overview

Review Pending, Needs attention, Confirmed, month-to-date, and contract-to-date totals.

2 Work the request queue

Search by participant or reference, filter by status/action, then select View details.

3 Take the correct action

Acknowledge a new request, ask for information, or decline with a participant-visible explanation. Acknowledge/complete or decline change and cancellation actions.

4 Request for a participant

Choose the approved participant first, then complete the same ride details and approved-location fields used in participant requests.

5 Review participant snapshots

Use period filters to review participant profile, phase, ride metrics, approved locations, costs, and accountability details.

6 Export and report

Export the filtered request queue to CSV. Review invoice records when issued; payments are not processed in the portal.

Confirmation boundary

Acknowledged does not mean confirmed. A ride becomes Confirmed only after Lake Ride Pros schedules and links the actual trip. A change/cancellation request also does not alter the confirmed trip until processed.

Privacy + access

Coordinator views contain confidential participant and cost information. Use only for authorized program work, do not share screenshots/exports, sign out on shared devices, and use the minimum necessary information.

Pending – review

Needs attention – respond

Action requested – process

Confirmed – scheduled trip linked
